This is the sixteenth year that we have published an annual update on our life saving charity. Our efforts remain the same: *WE ARE HELPING ELIMINATE ABORTIONS*. By year's end we will have sent about 130,000 free gift packs to centers in all 50 states plus several other countries.

When we first started this charity, we expected to rely on blind faith as our only way of knowing we were doing the right thing. Now, we can tell you that the centers using our gift packs have assured us we are achieving our goal. Several times we have gotten direct feedback from the centers.

Our very first save was a mom who planned on an abortion. She changed her mind and later came back and got a second gift pack because she was about to have twins. The twins would be juniors in high school this year.

Another mom was simply angry that her test came back positive. Every time she opened her dresser drawer, she saw our gift pack there where she had placed it. Each time, her resolve to get an abortion was lessened and finally she knew: *Her baby would be allowed to live because she would give birth to her baby.*

Another mom was terribly distraught. She was sobbing uncontrollably until she was handed one of our gift packs. She looked at her counselor through her tears and said simply, "Do you mean someone really cares?" If she only knew the love we feel for her and for her baby.

More recently, we had a mom who left the center planning on an abortion. She took one of our gift packs with her. Later on that week, the gift pack caused her to change her mind. Magically, the same gift pack caused her best friend to change her mind, because she, too, was planning on aborting her pregnancy. One gift pack, two lives saved. Praise the Lord for that!

Very recently, one of the centers contacted us for special prayers. One of the clients was bound and determined to have an abortion. *But...* She took one of our gift packs with her when she left the center. We prayed hard on this one. I am happy to tell you all that she is letting that unborn baby live, too. Please ask God to give them both good lives.

Last year, we challenged the bootie makers to collectively match the 24,000 pairs of booties turned out by my father before his death at the age of 105. Here is an update: It looks like we will collectively match that number in just two year's time. Thanks so much for a really stupendous result. Please keep up the good work.

Merry Christmas to all and God's Love to each of you,

Dick Jacobs

Gifts for the Unborn donates gift packages containing baby booties/infant socks, picture frames and little baby soaps, shampoos and other small care-giving items to Crisis Pregnancy Agencies around the world. Our gifts are given to pregnant moms at the time of their positive pregnancy test or when they receive their first ultrasound. The gifts help each mom realize that her unborn child is already a human being and begins the bonding process between mother and child.
